COUNCILLOR M. ROHLOFF

On Wednesday 22nd August 2012 the Charollais Sheep Genetics NZ was formed.

The breed has agreed on the following –

That the breed has Appendix flocks. At the $\frac{3}{4}$ stage ewes are eligible to enter the purebred flock and the resulting progeny are purebred. Rams require a further cross to be used in a Purebred flock and Appendix flock.

That all sheep entering a Purebred flock from an Appendix Flock be tested ‘clear’ of any genetic disorders that may be associated with that particular sheep breed.

That it be mandatory for all members to be on SIL.

That all members participate in the Across Flock Scheme.

That any ram(s) representing the breed in the CPT trial be chosen by the group.

That it be the role of the organization to give assistance to new breeders

That purebred Charollais rams and ewes for breeding should be tested for Microphthalmia.

That 3/4 ewes entering purebred flocks must be inspected by a Council Appointee.

From 2014 all sheep previously denoted with prefix Danengate will now be shown with the prefix Farmgene.
